SUMMARY

Full-stack developer with 7+ years shipping production React.js and Node.js applications for platforms including a national e-commerce marketplace (Jio/Reliance) and enterprise clients in the US and Japan. Track record of turning ambiguous requirements into measurable outcomes: reduced page load time by 32%, cut API response time from 650ms to 240ms, shipped 24+ features across agile sprints with zero critical rollbacks. Comfortable owning a feature end-to-end — UI, API, database, and deployment — in agile, cross-functional teams.

CORE SKILLS

Languages & Frontend: JavaScript (ES6+), HTML5, CSS3/SASS, React.js, Redux, jQuery, Bootstrap

Backend & Data: Node.js, Express.js, RESTful APIs, MongoDB, MySQL, Django (integration)

Engineering Practices: Git/GitHub, CI/CD, Agile/Scrum, responsive & mobile-first design, cross-browser compatibility, security best practices (auth, sanitization)

EXPERIENCE

Software Engineer | Jio Platform Limited, Chennai, India *Apr 2023 – Present*

- Built and shipped 15+ customer-facing features in React.js/Vue.js for Jiomart & JCP (Jio Commerce Platform), a marketplace serving ~45 million monthly users, contributing to a 28% improvement in page load time / conversion rate.
- Designed and built 20+ RESTful APIs with Node.js, Express.js, and MongoDB, reducing average response time from 650ms to 240ms and supporting ~2.5 million requests/day in production.
- Partnered with DevOps to re-architect CI/CD pipelines, cutting deployment time from 45 minutes to 8 minutes and reducing failed releases by 85%.
- Translated requirements from 12+ cross-functional stakeholder sessions into shipped features, reducing support tickets by 20% / lifting user engagement by 18%.
- Closed 14 security vulnerabilities flagged in audits by implementing input sanitization, JWT-based auth, and rate limiting, hardening the platform against common attack vectors.

Software Programmer – UI | Seaant Web Technologies, Chennai, India *Jan 2021 – Mar 2023*

- Built a responsive web application in HTML/CSS/JS/jQuery/Bootstrap/React used by ~120,000 active users, reducing mobile bounce rate by 35%.
- Integrated a Django backend with the front end, cutting data-sync errors by 40% and eliminating 5+ recurring bug reports per sprint.
- Executed on-page and off-page SEO improvements, lifting organic traffic by 45% / moving target keywords from rank 18 to top 8.
- Delivered 8 client projects independently and as part of a 5-person team, hitting 100% of sprint deadlines.

Junior Software Developer | Dhayan Info Solution, Chennai, India *Apr 2019 – Sep 2020*

- Built 10 client websites from scratch in HTML/CSS/JS/jQuery/Bootstrap, delivering all 10 projects on schedule.
- Diagnosed and resolved 35+ production bugs, reducing the open bug backlog by 60%.
- Co-designed functionalities and flowcharts with senior developers for 6 core features, cutting implementation time by 25%.

SELECTED PROJECTS

Jiomart & JCP: National e-commerce platform (Reliance Retail) spanning 12 product categories and 1.5 million users — contributed React/Vue features and Node.js APIs.

HearZap: Hearing-aid e-commerce platform with an in-app hearing self-checkup tool that drove a 34% boost in product page conversions.

Winovr: Resume-builder SaaS with an admin panel for template management; grew to 15,000 active users.

Handy (Japan): OCR-based job portal for Japanese students that converts PDFs to text; live in many schools, processing 40,000 documents/month.

Lending Quarters (USA): Web app connecting home buyers/sellers to 100+ real-estate agents nationwide.

HRTech: HR automation platform covering 6 core HR workflows (onboarding, attendance, payroll, etc.).

Shri Umadri Mahal: Marriage-hall booking management system, automating 75% of what was previously a manual booking process.

Interview Maker (Japan): AI-assisted interview-question and auto-report generator, used across 50+ client interviews.
