SUMMARY

Software Development Engineer with 7+ years shipping production React.js and Node.js applications, currently on JioMart and the Jio Commerce Platform at Reliance. Previously delivered eight products for clients in the US, Japan and India, most pairing a customer-facing application with the internal admin console behind it. Comfortable owning a feature end to end — UI, API, database and deployment — and used to working with product teams across time zones.

CORE SKILLS

Frontend: JavaScript (ES6+), React.js, Redux, HTML5, CSS3/SASS, Bootstrap, responsive & mobile-first design, cross-browser compatibility

Backend & Data: Node.js, Express.js, RESTful APIs, MongoDB, MySQL, Django (UI integration)

Practices: Git/GitHub, CI/CD, Agile/Scrum, authentication & input sanitization, code review

EXPERIENCE

Software Engineer | Jio Platforms Limited, Chennai

Apr 2023 – Present

- Built and shipped 15+ customer-facing features in React.js for JioMart and JCP (Jio Commerce Platform), Reliance Retail's national e-commerce marketplace serving 4lakhs monthly users.
- Designed and built 20+ RESTful APIs with Node.js, Express.js and MongoDB, reducing average response time from 650ms to 240ms and supporting ~2.5 million requests per day in production.
- Reduced page load time by 24% on customer-facing pages through code splitting, memoization and bundle optimization.
- Partnered with DevOps to re-architect CI/CD pipelines, cutting deployment time from 45 minutes to 8 minutes and reducing failed releases by 85%.
- Translated requirements from 12+ cross-functional stakeholder sessions into shipped features, reducing support tickets by 20%.
- Closed 14 security findings from internal audits by implementing input sanitization, JWT-based authentication and rate limiting.

Software Programmer – UI | Seaant Web Technologies, Chennai

Jan 2021 – Mar 2023

- Delivered the UI for 8 production products across recruitment tech, healthcare, US fintech, HR tech and hospitality — Handy (Japan), Interview Maker (Japan), Winovr, HearZap, Lending Quarters (USA) and Shri Umadri Mahal — using JavaScript (ES6+), React.js, jQuery and Bootstrap.
- Built the UI and data integration layer for Handy, a Japanese school job portal, surfacing job postings parsed from uploaded PDFs by a background OCR pipeline and handling incomplete or low-confidence extractions — now processing ~40,000 documents per month.
- Built Winovr, an ATS-optimized resume builder, implementing multiple resume templates with live preview alongside an admin console for template and user management; grew to 15,000 active users.
- Delivered customer-facing and administrative interfaces for HearZap (hearing care), Lending Quarters (US real estate) and Shri Umadri Mahal (venue booking), each pairing a public flow with an internal admin console for operations teams.
- Integrated front-end interfaces with Django views and REST endpoints across all 8 products, cutting data-sync errors by 40% and eliminating 5+ recurring bug reports per sprint.
- Shipped two Japan-market products with multi-language, locale-aware layouts, coordinating requirements directly with the client team across the time-zone gap.
- Delivered 8 client projects independently and within a 5-person team, hitting 100% of sprint deadlines.

Junior Software Developer | Dhayan Info Solution, Chennai

Apr 2019 – Sep 2020

- Built 10 client websites from scratch in HTML, CSS, JavaScript, jQuery and Bootstrap, delivering all 10 on schedule.
- Diagnosed and resolved 35+ production bugs, reducing the open bug backlog by 60%.
- Co-designed functionality and flowcharts with senior developers for 6 core features, cutting implementation time by 25%.

SELECTED PROJECTS

- **JioMart & JCP** — National e-commerce platform (Reliance Retail) spanning 12 product categories; contributed React features plus Node.js APIs.
- **Handy (Japan)** — OCR-based job portal for Japanese school students; converts uploaded PDFs to structured job listings, live across many schools.
- **HearZap** — Hearing-aid e-commerce platform with an in-app hearing self-checkup tool that drove a 34% increase in product page conversions.
- **Winovr** — ATS resume-builder SaaS with an admin panel for template management; 15,000 active users.
- **Interview Maker (Japan)** — AI-assisted interview-question and auto-report generator, used across 50+ client interviews.
- **Lending Quarters (USA)** — Web app connecting home buyers and sellers to 100+ real-estate agents nationwide.
- **Shri Umadri Mahal** — Marriage-hall booking and management system, automating 75% of a previously manual booking process.
- **HRTech** — HR automation platform covering 6 core workflows including onboarding, attendance and payroll.
