1. What is JewelKit?

JewelKit is a WhatsApp-based business management tool designed specifically for **covering jewellery resellers** in India. Instead of using a complicated app, sellers simply type messages in WhatsApp in their own language (Tamil, English or Hindi), and JewelKit automatically records the transaction, updates the balance, and sends reports.

■ The Problem It Solves:

Most jewellery resellers give items on credit to neighbours and forget who owes how much. They lose money because they cannot track dues. JewelKit solves this completely — just send a WhatsApp message and the bot does the rest.

2. Who is JewelKit For?

- ■ Covering / imitation jewellery sellers who sell door-to-door
- ■ Sellers who give items on credit to neighbours and friends
- ■ Sellers who struggle to remember who owes how much money
- ■ Sellers who use WhatsApp daily but find apps confusing
- ■ Sellers in Tamil Nadu, Andhra Pradesh, Kerala, Karnataka and beyond
- ■ Any small business owner who gives credit — milk, vegetables, grocery

JewelKit works even for people who cannot read English — the bot communicates in **Tamil**, the seller's native language, so there is zero learning curve.

3. How to Start (Seller Guide)

Step 1 — Find the Bot Number	Ask the JewelKit agent (the person who sold you the subscription) for the WhatsApp bot number. Save it in your phone as "JewelKit Bot".
Step 2 — Send First Message	Open WhatsApp and send "Hi" or "■■■■■■■■" to the bot number. The bot will reply asking for your name.
Step 3 — Enter Your Name	Type your name (e.g., "Kavitha") and send. The bot saves your account automatically. No app download, no password, no email needed!
Step 4 — Start Using	That's it! Now send any transaction message and the bot handles the rest. See commands in Sections 4, 5, and 6 below.
Step 5 — Access Dashboard (Optional)	Your educated family member or the JewelKit agent can view all your data on the web dashboard at the JewelKit website using your mobile number and a 4-digit PIN.

4. WhatsApp Commands — Tamil (தமிழ்)

Type these messages in WhatsApp to your JewelKit bot number:

WhatsApp Type	Example Message	What Happens
■ Sale (விற்பனை)	Kavitha 500 vaangi	Kavitha ■500 ■■■■■■■■■■ — balance ■500
■ Sale	Selvi 1000 vittom	Selvi-■■■■ ■1000 ■■■■■■■■■■
■ Payment (புரட்சி)	Kavitha 200 kuduthal	Kavitha ■200 ■■■■■■■■■■ — balance ■300
■ Payment	Kavitha 200 pay pannanga	Same as above — different words
■ Balance	Kavitha balance	Kavitha balance: ■300 show aaGum
■ Balance	Kavitha bakki	Same — bakki = balance in Tamil
■ Pending List	list	Ellaa pending customers pattiyaIm
■ Pending List	pattiyal	Same as list
■ Today	today	Indru sale + collection summary
■ Today	iniku	Same — indru in Tamil
■ Report	report	This month full summary
■ Report	maatha report	Same — maatham = month
■ Stock	stock	Jewellery stock summary
■ Help	help	All commands list kaattum

■ Important Tips (தமிழ் மற்றும் ஆங்கிலம்):

- Customer name and amount is enough — no need for perfect spelling
- "Kavitha 500 vaangi" or "kavitha vaangi 500" — both work!
- If new customer, bot creates their account automatically
- Tamil words AND English words both work in messages

5. WhatsApp Commands — English

WhatsApp Type	Example Message	What Happens
■ Sale	"Kavitha bought 500"	Records ■500 sale for Kavitha
■ Sale	"Sold Selvi 1000"	Records ■1000 sale for Selvi
■ Payment	"Kavitha paid 200"	Records ■200 payment from Kavitha
■ Payment	"Received 300 from Selvi"	Records ■300 payment from Selvi
■ Balance	"Kavitha balance"	Shows Kavitha's current balance
■ Balance	"Kavitha due"	Same — shows pending amount
■ List	"list"	All pending customers
■ List	"show all"	Same as list
■ Today	"today"	Today's sales and collection
■ Report	"report"	Monthly summary
■ Stock	"stock"	Current stock summary
■ Help	"help"	All commands

6. WhatsApp Commands — Hindi (■■■■■)

WhatsApp Type	Example Message	What Happens
■ Sale	"Kavitha ne 500 ka liya"	■500 ■■ sale Kavitha ■■ ■■■■
■ Sale	"Kavitha ko 1000 diya"	■1000 ■■ sale Kavitha ■■
■ Payment	"Kavitha ne 200 diya"	Kavitha ■■ ■200 ■■■■
■ Payment	"300 mila Kavitha se"	Kavitha ■■ ■300 ■■■■
■ Balance	"Kavitha balance"	Kavitha ■■ balance ■■■■■■■■
■ Balance	"Kavitha bakaya"	Same — bakaya = balance
■ List	"list"	■■■ pending customers
■ Today	"today" / "aaj"	■■ ■■ summary
■ Report	"report"	■■■■■ ■■ ■■■■ report
■ Help	"help"	■■■ commands

7. Dashboard Guide

The web dashboard is for the seller's educated family member, agent, or for the seller herself if she can use a smartphone browser. It shows all data visually and allows adding transactions manually.

How to Login to Dashboard

- 1. Open browser and go to the JewelKit website URL
- 2. Enter your 10-digit mobile number (without +91)
- 3. Enter your 4-digit PIN (default PIN for first login: 1234)
- 4. Click Login — dashboard opens
- 5. Change your PIN from Settings page after first login

■ Dashboard

- Total customers and how many are pending
- Today's sales and amount collected
- Monthly revenue figure
- Total amount pending from all customers
- 6-month sales trend chart
- Quick action buttons for common tasks
- WhatsApp commands reference guide

■ Customers / ■■■■ ■■■■■■■■

- List of all customers with their current balance
- Red border = pending amount, Green = all paid
- Add new customer manually
- Record a sale or payment for any customer
- View full transaction history for each customer
- Edit customer details (name, phone, area)
- Delete individual transactions if entered by mistake

■ Stock / ■■■■■■

- List of all jewellery stock items
- Current quantity for each item
- Cost price and selling price per item
- Profit percentage auto-calculated
- Low stock warning (red badge)
- Add new stock when you buy from market
- Mark items as sold/used

■ Reports / ■■■■■■

- Select any month to see that month's data
- Total sales, amount collected, pending dues
- List of all transactions for the month
- Top customers with highest pending amounts

■ Settings

- Change bot language (Tamil / English / Hindi)
- View WhatsApp bot number
- See all available commands
- View current subscription plan and expiry
- Upgrade plan by paying via PhonePe/GPay

8. Stock Management

Stock management helps you know exactly how many pieces of each jewellery item you have, what you paid for them, and how much profit you make when you sell.

Stock Categories Available

■ Necklace	All types of necklaces
■ Bangles	Bangles and bracelets
■ Earrings	Ear studs and drops
■ Rings	Finger rings
■ Anklets	Ankle chains
■ Chains	Neck chains
■ Sets	Complete jewellery sets
■ Other	Any other category

How to Use Stock

- When you buy new stock from market: Dashboard → Stock → Add Item
- Fill: Name, Category, Quantity, Cost Price, Selling Price
- When you sell an item: Click "Sold/Used" and enter quantity
- Stock automatically updates — no manual calculation needed
- When stock falls below minimum → ■■ Low Stock warning appears
- Bot sends low stock alert to your WhatsApp every Monday

9. Reports & Analytics

Reports help you understand your business performance each month:

Total Sales	Sum of all items sold on credit this month
Collected	Total cash received from all customers
Pending	Total outstanding balance from all customers
Transactions	Number of sales and payments this month
Top Customers	Which customers owe the most money
6-Month Trend	Chart showing whether your business is growing

WhatsApp Quick Reports

Type these in WhatsApp for instant reports without opening the dashboard:

"today"	Today's sales total and how much cash collected
"report"	This month's full summary — sales, collection, pending
"list"	All customers who still owe money, with amounts

10. Subscription & Payment

Plan	Price	Trial	Features
■ Free Trial	■ 0	14 days	WhatsApp bot, customer tracking, balance check, stock, basic reports
■ Paid Plan	■ 99/month	All Free features +	dedicated + automatic payment reminders, stock alerts, full reports, broadcast messages

How to Pay for Subscription

- 1. Send PhonePe or GPay payment of ■ 99 to: 9940612737
- 2. After payment, send "paid" to the JewelKit bot on WhatsApp
- 3. Your plan is activated within minutes
- 4. You receive confirmation from the bot
- 5. Monthly auto-reminder sent before expiry — just pay and send "paid"

11. Product Owner Admin Panel

The Admin Panel is exclusively for you — the product owner (Deva Sankar). It gives you complete visibility and control over all sellers using the JewelKit platform. Accessible at **/admin** URL on your deployed website.

How to Access Admin Panel

- 1. First time: Run POST `/api/admin/setup` with your name, email and password
- 2. Go to `yoursite.com/admin/login`
- 3. Enter your admin email and password
- 4. Admin dashboard opens — separate from seller dashboard
- 5. Token is valid for 7 days — auto-expired after that

Admin Panel Pages

■ Admin Dashboard

- Total sellers (active, free, paid)
- Platform MRR (monthly recurring revenue)
- New sellers today / this week / this month
- Expiring soon and expired subscription alerts
- 6-month signup trend chart
- Language breakdown (Tamil/English/Hindi)

■ All Sellers

- Complete list of every registered seller
- Search by name or phone number
- Filter by plan (free/paid) and status
- View detailed profile for each seller
- See their customers, transactions, stock items
- Change plan (free ↔ paid, 1 to 12 months)
- Block or unblock a seller
- Send direct WhatsApp message to a seller
- Delete seller and all their data permanently

■ Revenue

- Current MRR and month-over-month growth
- Annual Run Rate projection
- 12-month MRR trend line chart
- Top sellers ranked by activity (most transactions)

■ Broadcast

- Send WhatsApp message to ALL sellers at once
- Filter by: All / Paid only / Free only
- Pre-built message templates (renewal, new feature, offer)
- See delivery count: how many sent vs failed

■■ Admin Settings

- Your admin profile
- Complete API reference for all admin endpoints

13. Technical Setup Guide

Prerequisites

- Node.js v18+
- MongoDB Atlas account (free at mongodb.com/atlas)
- Twilio account (free sandbox at twilio.com)
- Meta Developer account (for WhatsApp Cloud API)
- Railway.app account (free hosting)

Step-by-Step Deployment

Step 1 — Backend Setup

Step 2 — Frontend Setup

Step 3 — Create Admin Account

Step 4 — Configure Twilio

Step 5 — Configure Meta

Step 6 — Deploy to Railway

Environment Variables (.env)

Variable	Required	Description
MONGODB_URI	■ Yes	MongoDB Atlas connection string
JWT_SECRET	■ Yes	Minimum 32 character secret key
TWILIO_ACCOUNT_SID	■ Yes	From Twilio Console
TWILIO_AUTH_TOKEN	■ Yes	From Twilio Console
TWILIO_WHATSAPP_FROM	■ Yes	whatsapp:+14155238886 (sandbox)
META_PHONE_NUMBER_ID	■■ Optional	From Meta WhatsApp Cloud API
META_WHATSAPP_TOKEN	■■ Optional	Permanent access token from Meta
META_VERIFY_TOKEN	■■ Optional	Any random string you choose
RAZORPAY_KEY_ID	■■ Optional	For payment collection (future)
CLIENT_URL	■ Yes	Your frontend URL (http://localhost:3000)

14. Troubleshooting

■ Bot not replying to WhatsApp	■ Check Twilio webhook URL is correct and HTTPS. Check TWILIO_ACCOUNT_SID and AUTH_TOKEN in .env. Check server is running on correct port.
■ Wrong customer matched	■ Use the exact customer name consistently. If "Kavitha" and "Kavitha akka" both exist, bot may match wrong one. Delete duplicate and use one name.
■ "Customer not found" error	■ Bot creates new customer automatically if not found. But if name spelling is very different, type the exact saved name.
■ Dashboard login not working	■ Ensure phone number is exactly as registered (with +91 if saved with country code). Default PIN is 1234 for first login.
■ Bot responds in wrong language	■ The bot auto-detects language from your message. To fix permanently, change language in Settings page of dashboard.
■ Balance shows wrong amount	■ An entry may have been made by mistake. Go to dashboard → Customers → History → Delete wrong entry. Balance auto-corrects.
■ Cannot access admin panel	■ Ensure admin setup was run first (POST /api/admin/setup). Admin URL is /admin/login (not the seller /login page).
■ Cron jobs not running	■ Ensure server is running 24/7 (use Railway or Render for deployment). Local server goes off when laptop is closed.

15. Tips & Best Practices

■ Teach Sellers One Command First	Don't teach all commands at once. Start with just one: "Name amount vaangi". Once they use it daily for a week, teach payment command.
■ Consistent Customer Names	Always use the same name for same customer. "Kavitha", "Kavitha akka", "Kavitha R" — pick one and stick to it.
■ Check List Every Monday	Send "list" every Monday to see who owes money. Call those people. Collection improves dramatically.
■ Record Even Small Amounts	Even ■50 transactions should be recorded. Small amounts add up to thousands over a month.
■ Update Stock Immediately	When you return from market with new stock, immediately update in dashboard or send stock message to bot.
■ Offer Demo Before Selling	When approaching new sellers, do a live demo: take their phone, type "Kavitha 500 vaangi" — show them the magic instantly.
■■■ Family Member as Dashboard User	Identify the most educated family member of each seller. Train them on the dashboard. Seller uses WhatsApp, family member views reports.
■ Monthly Review Meeting	Visit each paid seller once a month. Show them their report. They see the value — retention improves to 90%+.

16. Support & Contact

Support Channel	How to Reach	Response Time
■ WhatsApp Support	Message on WhatsApp: 9940612737	Within 2 hours
■ Email	ddeva8560@gmail.com	Within 24 hours
■ Portfolio	deva-sankar.web.app	Always available
■ LinkedIn	Deva Sankar — Full Stack Developer	Within 24 hours

Thank you for choosing JewelKit! ■
